

{ EMMANUELLE HOMMET }

CODER. **FRONT END DEVELOPER** . PASSIONATE.

For 3 years, I have been dedicating all my time to the practise and learning of code. I have developed a solid expertise in the main front and back languages including some of their frameworks.

I specialize now in Javascript and in particular AngularJS. I find that this framework increases the productivity and the user interface responsiveness

My 15 years of professional experience and my international profile bring me skills that complement my technical and programming skills. (project management, team leading, capacities for adaptation...)

My goal now is to be part of a team of passionate people on a motivating project to take advantage of my knowledge whilst continuing to develop it.

EXPERIENCE AND TECHNICAL SKILLS

Currently

I am actually **leader** of the team developing the website : roadweb.fr : Collaborative project combining **40 persons** working in the web (developers, designers, marketers, community managers). For V1, we use **php and Laravel**. We are currently working on the V2 using **AngularJs**.

This experience is very rich, both from a **technical and management point of view**. Because of the **scope of the project**, we met many obstacles that we needed to solve: misunderstanding between the expectations of designers and developers, distance working issues, respect of deadlines, allocation of responsibilities and decision-making powers.

Javascript / Angularjs Training with Simplon (<http://simplon.co>)

The goal is to specialize in **Javascript** and **AngularJS**.

loeildelexpat.com

I created this **blog** in order to discover how a **CMS** works and what are its possibilities concerning customization . The codes of the plugins were particularly interesting to work on, especially regarding SEO .

Others

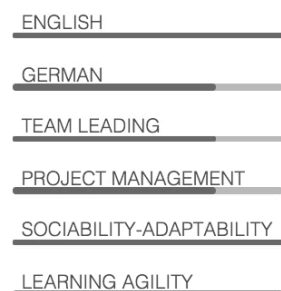

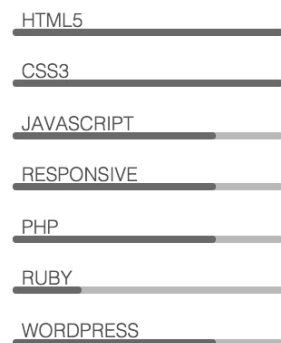

Full stack developer online training with Emweb (<http://www.emweb.fr>) (2013 à 2015)

This 2 years training brought me a thorough knowledge of the main languages (front end and back end). it gave me the passion of coding.

Germany : French Trainer for adults and kids at International School Augsburg (<http://www.isa-augsburg.com/en>) (2012-2016)

Korea : French Trainer for adults and kids at International school Sacheon (<http://gifs.or.kr>) (2008)

France : French Teacher in Education Nationale (<http://www.education.gouv.fr>), IT adviser (1999 à 2012)

EDUCATION

1999 - 2001	IUFM Nice
1995 - 1998	Licence Anglais
1991 - 1993	Bac C - Mathematical and physical sciences
